

Natural Beeswax Lip Balm

Hebert Honey products are all handcrafted of 100% natural ingredients. The honey and beeswax used in these products are both produced by our bees, extracted and processed by us using standards and dedication to provide the purest of natural products.

This Beeswax Lip Balm is natural in every aspect. Only the finest oils are used and there are no petrol chemicals or drying alcohol used in the preparation of this LONG LASTING product and it will last 8 to 12 months under normal use.

Honey and Vitamin E are used to help repair skin cells and keep lips soft and healthy. The main ingredient, Sweet Almond Oil, contains antioxidants and is rich in enzymes and amino acids, minerals and vitamins that feed and enrich your skin and promote healing dried cracked lips. Coconut oil is used to moisten and beeswax is used to form a protective coating on the skin to hold in moisture and let the body heal from within. You will love the way it feels. Hours after you put it on you can rub your lips together and feel it on there working for you.

Hebert Honey

This years honey crop was darker in color due to the lack of rain. Many beekeepers found little or no honey in the hives this fall. Each year the color of the honey varies with the types of plants visited by the bees and the time of

year that the honey is removed and the weather. Late honey is usually darker in color because of the goldenrod that blooms later in the summer.

There are many other characteristics of minimally processed natural honey that are important to the consumer. Natural honey still has the pollen needed to build antibodies for fighting allergies. It also contains Royal Jelly, propolis and other important enzymes and anti-oxidants found only in natural, local honey, that are so important in maintaining good health and building immunities to

allergies.

Pollen Allergies

Bee pollen seems to supply something that some stressed young and aging people need. It is used to retard hardening of the arteries and to strengthen the circulatory system. It is used to combat the symptoms of illness and allergies. It is believed to regulate the function of the endocrine system. When eaten with meals it is believed to aid digestion. It also lessens women's menstrual cramps.

It is believed to reduce stress and increase alertness and stamina. Olympic and other athletes use pollen as a low calorie protein source and as a quick, yet sustained source of energy.

A very few people are allergic to bee pollen. It is suggested that people start taking small amounts of Bee Pollen and gradually increase the amount until they are taking one to two teaspoonfuls daily. If allergic symptoms occur, temporarily decrease the amount taken. Soon the symptoms will disappear.

What does it taste like? Bee Pollen looks like tiny yellow, tan, orange and brown balls. It varies in taste depending on the plants, flowers, trees, shrubs

and grasses from which it comes. It has a sweet nut-like, natural flavor. It can be eaten alone and chased with water or mixed in a smoothie or put on cereal (hot or cold).

Castile/Beeswax Soap

For centuries people the world over have been using the wax produced by the bees to make high quality long lasting soap. The ancient Greeks used olive oil and beeswax to produce a fine Castile soap that leaves the skin feeling soft and moist. The addition

of honey and oatmeal to some of the bars exfoliates while adding natural emollients and enzymes to improve the health and feel of your skin. The Pollen Soap feeds your skin making it soft and healthy. The deep cleaning lemon soap with it lemon zest in each bar smells great.

Pet Balm

At last, a 100% natural product for your pet. Dry Rough, Cracked pads and noses will benefit from this hard working , gentle, wholesome, natural cream. Nose 'n Toes has the same healing ingredients found in our Gardener's cream. The perfect size tin for the pocket or pocketbook.

Sweet almond oil is the main ingredient, rich in antioxidants and emollients needed for healthy skin growth and maintenance. Coconut and vitamin E oils combine with the healing power of honey and calendula. Natural pure beeswax forms a protective layer, allowing the body to heal from the inside out.
